*Abstract:* EPA created ENERGY STAR as a voluntary program to help businesses and individuals protect the environment through superior energy efficiency. The program focuses on reducing utility-generated emissions by reducing the demand for energy. In 1991, EPA launched the Green Lights Program to encourage corporations, state and local governments, colleges and universities, and other organizations to adopt energy-efficient lighting as a profitable means of preventing pollution and improving lighting quality. Since then, EPA has rolled Green Lights into ENERGY STAR and expanded ENERGY STAR to encompass organization-wide energy performance improvement, such as building technology upgrades, product purchasing initiatives, and employee training. At the same time, EPA has streamlined the reporting requirements of ENERGY STAR and focused on providing incentives for improvements (e.g., ENERGY STAR Awards Program).

To join ENERGY STAR, organizations are asked to complete a Partnership Agreement that establishes their commitment to energy efficiency. Partners agree to undertake efforts such as measuring, tracking, and benchmarking their organization's energy performance by using tools such as those offered by ENERGY STAR; developing and implementing a plan to improve energy performance in their facilities and operations by adopting a strategy provided by ENERGY STAR; and educating staff and the public about their Partnership with ENERGY STAR, and highlighting achievements with the ENERGY STAR, where available. In addition, Partners and any other interested party can evaluate the efficiency of their buildings using EPA's online tools (e.g., Portfolio Manager) and apply for recognition.

*Form numbers:* 5900-19, 5900-22, 5900-89, 5900-195, 5900-197, 5900-198, 5900-262, 5900-263, 5900-264, 5900-265, 5900-382, 5900-383, 5900-387, 5900-436 and 5900-437.

*Respondents/affected entities:* EPA's ENERGY STAR Program in the Commercial and Industrial Sectors.

*Respondent's obligation to respond:* Voluntary.

*Estimated number of respondents:* 37,021 (total).

*Frequency of response:* One-time, annually, or on occasion.

*Total estimated burden:* 210,306 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$14,859,991 (per year), includes \$5,034,450 in annualized capital or operation & maintenance costs.

*Changes in the estimates:* There is a decrease of 43,778 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due in part to program enhancements and clarifications. The decrease is also due to EPA's adjustments to its burden estimates. For example, EPA adjusted its analysis of its online tool, Portfolio Manager, to reflect data indicating that, although use of the tool is increasing, users are spending less time per

building benchmarked, on average, than in the past.
