The Public Inspection File R&O removed and reserved 47 CFR.76.1708.

This collection is being revised to reflect the removal of 47 CFR 76.1708 made in the *Public Inspection File R&O*.

The other information collection requirements contained under this collection and have not changed are as

follows:

47 CFR 76.56 requires cable television systems to carry signals of all qualified local commercial and Noncommercial Educational (NCE) stations requesting carriage. As a result of this requirement, the following information collection requirements are needed for this collection:

47 CFR 76.1709(a) states that the operator of every cable television system shall maintain for public inspection a file containing a list of all broadcast television stations carried by its system in fulfillment of the must-carry requirements pursuant to 47 CFR 76.56. Such list shall include the call sign; community of license, broadcast channel number, cable channel number, and in the case of a noncommercial educational broadcast station, whether that station was carried by the cable system on March 29, 1990.

47 CFR 76.1709(c) states that a cable operator shall respond in writing within 30 days to any written request by any person for the identification of the signals carried on its system in fulfillment of the requirements of 47 CFR 76.56.

47 CFR 76.1614 states that a cable operator shall respond in writing within 30 days to any written request by any person for the identification of the signals carried on its system in fulfillment of the requirements of 47 CFR 76.56. The required written response may be delivered by email, if the consumer used email to make the request or complaint directly to the cable operator, or if the consumer specifies email as the preferred delivery method in the request or complaint.

Additionally, 47 CFR 76.1620 states that if a cable operator authorizes subscribers to install additional receiver connections, but does not provide the subscriber with such connections, or with the equipment and materials for such connections, the operator shall notify such subscribers of all broadcast stations carried on the cable system which cannot be viewed via cable without a converter box and shall offer to sell or lease such a converter box to such subscribers. Such notification must be provided by June 2, 1993, and annually thereafter and to each new subscriber upon initial installation. The notice, which may be included in routine

billing statements, shall identify the signals that are unavailable without an additional connection, the manner for obtaining such additional connection and instructions for installation.
