## **SUPPLEMENTARY INFORMATION:**

### **I. What Information is EPA Particularly Interested in?**

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting

electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

## **II. What Information Collection Activity or ICR Does this Action Apply to?**

*Title:* Application for New and Amended Pesticide Registration.

*EPA ICR number:* 0277.20.

*OMB control number:* OMB Control No. 2070-0060.

*ICR status:* This ICR is currently scheduled to expire on September 30, 2020.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the Federal Register when approved, are listed in 40 CFR part 9, are displayed either by publication in the Federal Register or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

*Abstract:* The information collected under this ICR is used by EPA to evaluate an application for the registration of a pesticide product under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA). FIFRA provides EPA with the authority to regulate the distribution, sale and use of pesticides in the United States to ensure that they will not pose unreasonable adverse effects to human health and the environment. Pesticides that meet this test receive a license or "registration."

*Burden statement:* The annual public reporting and recordkeeping burden for this collection of

information is estimated to range from 14 hours to 646 hours per response, depending upon the type of activity. Estimates for the respondent's application burden for this collection of information average 194 hours per application for "Type A" activities (which include new active ingredients and new uses) and 14 hours per application for "Type B" activities (which include amendments and notifications). The burden estimate for "Type C" reduced risk applications, which are handled only by RD, is an average of 646 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

*Respondents/Affected Entities:* Entities potentially affected by this ICR are pesticide and other agricultural chemical manufacturing engaged in activities related to the registration of a pesticide product.

*Estimated total number of potential respondents:* 1,808.

*Frequency of response:* On occasion.

*Estimated total average number of responses for each respondent:* 7,440.

*Estimated total annual burden hours:* 145,840 - 1,595,306 hours.

*Estimated total annual costs:* \$43,675,000 - \$64,424,000. This includes an estimated cost of \$0 for capital investment or maintenance and operational costs.]

### **III. Are There Changes in the Estimates from the Last Approval?**

There is an increase of 627 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects anticipated burden associated with several new registration-related programs that are online and anticipated to come

online in the next three years. This change is an adjustment.

#### **IV. What is the Next Step in the Process for this ICR?**

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another *Federal Register* document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under “**FOR FURTHER INFORMATION CONTACT.**”

**Authority:** 44 U.S.C. 3501 *et seq.*

Dated: January 30, 2020.
