SUPPLEMENTARY INFORMATION:

Description: The ACTA is an effort by the ACF Children's Bureau. The purpose of the ACTA is to engage child welfare agencies to improve the timeliness and likelihood of permanency for children who are waiting for adoption. This new information collection will provide the Children's Bureau with an understanding of agency target populations, specific strategies (interventions), and outcomes measurement, in order to inform technical assistance strategies and provide a national picture of the overall success of the initiative. Baseline data will be collected with an initial survey (Baseline Survey), followed by two administrations of a follow-up survey instrument (Progress Update Survey) designed to collect process and outcome measures at two additional points in time. The instruments focus on: (1) identifying the target population(s) agencies are addressing, (2) understanding elements of intervention implementation (process measures), and (3) capturing information related to the outcomes of these efforts.

Respondents: Respondents of these data collection instruments will include one representative from each of the 53 child welfare agencies who are participating in ACTA activities.
