SUPPLEMENTARY INFORMATION:

Background:

This National Telecommunications and Information Administration cybersecurity multistakeholder process focuses on promoting software component transparency. Most modern

software is not written completely from scratch, but includes existing components, modules, and libraries from the open source and commercial software world. Modern development practices such as code reuse, and a dynamic IT marketplace with acquisitions and mergers, make it challenging to track the use of software components. The Internet of Things compounds this phenomenon, as new organizations, enterprises, and innovators take on the role of software developer to add “smart” features or connectivity to their products. While the majority of libraries and components do not have known vulnerabilities, many do, and the sheer quantity of software means that some software products ship with vulnerable or out-of-date components.

The first meeting of this multistakeholder process was held on July 19, 2018, in Washington, DC.¹ Stakeholders presented multiple perspectives, and identified several inter-related work streams: Understanding the Problem, Use Cases and State of Practice, Standards and Formats, and Healthcare Proof of Concept. Since then, stakeholders have been discussing key issues and developing products such as guidance documents. NTIA acts as the convener, but stakeholders drive the outcomes. Success of the process will be evaluated by the extent to which broader findings on software component transparency are implemented across the ecosystem.

The first set of stakeholder-drafted documents on Software Bills of Materials was published by NTIA in November 2019. Those documents, and subsequent consensus-approved drafts from the community are published at: <https://www.ntia.doc.gov/SBOM>. The main objectives of the April 15, 2020, meeting are to share progress from the working groups; to give feedback on the ongoing work around technical challenges, tooling, demonstrations, and awareness and adoption; and to begin discussions around potential guidance or playbook
