II. Discussion

On February 4, 2020, the NRC published a document in the *Federal Register* (85 FR 6103) requesting input from its licensees and members of the public to identify outdated or duplicative administrative requirements that may be eliminated without an adverse effect on public health or safety, common defense and security, protection of the environment, or regulatory efficiency and effectiveness. The public comment period was originally scheduled to close on April 6, 2020. By letter dated March 12, 2020 (ADAMS Accession No. ML20084Q158), the Nuclear Energy Institute requested that the NRC extend the comment period by 30 days. The NRC is granting this request and will extend the public comment period until **May 6, 2020**, to allow more time for members of the public to submit their comments.

Dated at Rockville, Maryland, this 26th day of March 2020.

For the Nuclear Regulatory Commission.
