The purpose of the Assessment Methodology Review meeting is to review two proposed length-based assessment methodologies, a length-based Stock Synthesis (SS) modeling approach and the Length-based Integrated Mixed Effects (LIME) assessment platform. A review of data-moderate and data-limited assessment methods through the management strategy evaluation tool in the Data-Limited Methods ToolKit (DLMtool) will be conducted following the length-based assessment methods review (the draft proposed agenda will be posted on the Pacific Council's website).

No management actions will be decided by the Assessment Methodology Review panel members. The review panel members' role will be development of recommendations and reports for consideration by the SSC and Pacific Council at a future Council meeting.

Although nonemergency issues not contained in the meeting agendas may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent of the Assessment Methodology Review panel members to take final action to address the emergency.
