#### **SUPPLEMENTARY INFORMATION:**

Title: Enhanced Oil Recovery Project.

OMB Number: 1545-1292.

Regulation Project Number: TD 8448.

Abstract: For purpose of section 43 of the Code, this document provides final regulations relating to the enhanced oil recovery credit for certain costs that are paid or incurred in connection with a qualified enhanced oil recovery project. Changes to the applicable law were made by the Omnibus Budget Reconciliation Act of 1990. These final regulations provide the public with guidance in determining the costs that are subject to the credit, the circumstances under which the credit is available, and the procedures whereby a project is certified as a qualified enhanced oil recovery project.

This will decrease the number of responses by 1,550 and annual burden by 11,067 hours. This request is being submitted for renewal purposes.

Type of Review: Revision of a currently approved collection.

Affected Public: Business or other for-profit organizations, individuals, not-for-profit institutions, farms, and Federal, state, local or tribal governments.

Estimated Number of Respondents: 20.

Estimated Time Per Respondent: 73 hours.

Estimated Total Annual Burden Hours: 1,460.

The following paragraph applies to all the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number.

Books or records relating to a collection of information must be retained if their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Desired Focus of Comments: The Internal Revenue Service (IRS) is particularly

interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., by permitting electronic submissions of responses.

Comments submitted in response to this notice will be summarized and/or included in the ICR for OMB approval of the extension of the information collection; they will also become a matter of public record.
