II. Background

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statute also allows the Agency to renew exemptions at the end of the 5-year period. FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver’s medical certification.

The physical qualification standard for drivers regarding vision found in 49 CFR 391.41(b)(10) states that a person is physically qualified to drive a CMV if that person has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of a least 20/40 (Snellen) in both eyes with or without corrective lenses, field of vision of at least 70° in the horizontal meridian in each eye, and the ability to recognize the colors of traffic signals and devices showing red, green, and amber.

The 32 individuals listed in this notice have requested renewal of their exemptions from the vision standard in § 391.41(b)(10), in accordance with FMCSA procedures. Accordingly, FMCSA has evaluated these applications for renewal on their merits and decided to extend each exemption for a renewable 2-year period.

III. Request for Comments

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b), FMCSA will take immediate steps to revoke the exemption of a driver.

IV. Basis for Renewing Exemptions

In accordance with 49 U.S.C. 31136(e) and 31315(b), each of the 32 applicants has satisfied the renewal conditions for obtaining an exemption from the vision standard (see 64 FR 68195; 65 FR 20251; 67 FR 17102; 69 FR 17267; 71 FR 14567;

83 FR 34661; 83 FR 45749; 83 FR 54644). They have submitted evidence showing that
the vision in the better eye continues to meet the requirement specified at § 391.41(b)(10)
and that the vision impairment is stable. In addition, a review of each record of safety
while driving with the respective vision deficiencies over the past 2 years indicates each
applicant continues to meet the vision exemption requirements. These factors provide an
adequate basis for predicting each driver's ability to continue to drive safely in interstate
commerce. Therefore, FMCSA concludes that extending the exemption for each renewal
applicant for a period of 2 years is likely to achieve a level of safety equal to that existing
without the exemption.
