## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 10674-017]

#### **Kaukauna Utilities; Notice of Availability of Environmental Assessment**

In accordance with the National Environmental Policy Act of 1969 (NEPA) and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR Part 380, the Office of Energy Projects has reviewed the application for a new license for the Kimberly Hydroelectric Project (project), located on the Lower Fox River near the Village of Kimberly in Outagamie County, Wisconsin.

The environmental assessment (EA) analyzes the potential environmental effects of continuing to operate the project, and concludes that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website at <http://www.ferc.gov> using the eLibrary link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. At this time, the Commission has suspended access to Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID-19), issued by the President on March 13, 2020.
