## POLICY JUSTIFICATION

### Kuwait – Patriot Missile Repair and Return

The Government of Kuwait has requested to buy a Patriot missile Repair and Return program as follow-on support to FMS case KU-B-ULS. Included are Patriot GEM-T missile and missile components repair services, transportation, organizational equipment, repair parts, support equipment, tools and test equipment, technical data and publications, personnel training and training equipment, maintenance services, U.S. government and contractor engineering, technical, and logistics support services, and other related elements of logistics support. The total estimated program cost is \$200 million.

The proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally that is an important force for political stability and economic progress in the Middle East.

The proposed sale of the Repair and Return program for the Kuwait Patriot System will supplement and improve Kuwait's capability to meet current and future threats and provide greater security for its critical oil and natural gas infrastructure. Kuwait will use the enhanced capability to strengthen its homeland defense. Kuwait will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors involved with this potential sale are Raytheon Company, Huntsville, AL; Lockheed Martin, Huntsville, AL; LEIDOS, Inc., Huntsville, AL; and KBR, Huntsville, AL. There are no known offsets agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the temporary assignment of five (5) U.S. contractors to provide handling and documentation support for one (1) to two (2) years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
