SUPPLEMENTARY INFORMATION:

Title: Importation of Live Swine, Pork and Pork Products, and Swine Semen from the European Union.

OMB Control Number: 0579-0218.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals and animal products to prevent the introduction into and dissemination within the United States of livestock diseases and pests. To carry out this mission, APHIS regulates the importation of animals and animal products into the United States.

The regulations in 9 CFR part 94, prohibit or restrict the importation of specified animals and animal products to prevent the introduction of diseases such as classical swine fever (CSF), foot-and-mouth disease, swine vesicular disease, and African swine fever. Among other things, part 94 lists the requirements for the importation of pork and pork products and live swine where these diseases exist. Section 94.31 lists the requirements for the importation of pork, pork products, and breeding swine from the European Union (“the APHIS defined European CSF region”). In addition, 9 CFR 98.38 lists the requirements for the importation of swine semen from the APHIS-defined European CSF region.

These regulations require information collection activities, such as a certificate for pork and pork products, breeding swine, and swine semen; application for import or in-transit permit; and declaration of importation. Since the last approval, we have decreased the estimates of burden to reflect the decrease in importation of pork and pork products.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning this information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 1 hour per response.

Respondents: Foreign government animal health officials.

Estimated annual number of respondents: 194.

Estimated annual number of responses per respondent: 8.3.

Estimated annual number of responses: 1,611.

Estimated total annual burden on respondents: 1,598 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 28th day of September 2020.

Mark Davidson,

Acting Administrator, Animal and Plant Health Inspection Service.
