### **Petition for Waiver of Compliance**

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on September 23, 2020, Colebrookdale Railroad petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 232, Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-Of-Train Devices. FRA assigned the petition Docket Number FRA-2020-0080.

Colebrookdale Railroad is the operator of a tourist train over 8.6 miles of track owned by the Eastern Berks Gateway Railroad. Colebrookdale Railroad operates four historic passenger cars with Westinghouse UC air brakes. The UC valves are required to be clean, repaired, lubricated, and tested every 15 months. *See* 49 CFR part 232, appendix B; Association of American Railroads Standard S-045. The petitioner seeks a waiver to extend this requirement to every 30 months to save costs and extend the operating seasons.

The petitioner states that the UC valves are inspected by a certified brake shop in Leetsdale, Pennsylvania. Further, the Colebrookdale Railroad has never had a brake valve failure in seven years of operation, nor experienced an Initial Terminal Test or a Class III brake test failure, in any weather conditions. Additionally, improvements in

gasket material and lubrication have increased the reliability of these older valves over the years.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at [www.regulations.gov](http://www.regulations.gov).
