*Abstract:* This supporting statement addresses information collection activities that will be imposed by amendments to the National Emission Standards for Hazardous Air Pollutants (NESHAP) from Manufacturing of Nutritional Yeast, 40 CFR part 63, subpart CCCC, referred to in this document as the Nutritional Yeast NESHAP. This rule applies to facilities where the total hazardous air pollutants (HAP) emitted are greater than or equal to 10 tons per year of any single HAP, or where the total HAP emitted are greater than or equal to 25 tons per year of any

combination of HAP. Owners or operators of the affected facilities must submit initial notifications, performance tests and performance evaluation reports, and periodic reports and results. Owners or operators are also required to maintain records of performance tests and performance evaluations, monitoring, and any failure to meet a standard. These reports are used by EPA to determine compliance with the standards.

*Form Numbers:* None.

*Respondents/affected entities:* Nutritional yeast manufacturing facilities.

*Respondent's obligation to respond:* Mandatory (40 CFR part 63, subpart CCCC).

*Estimated number of respondents:* 4 (total).

*Frequency of response:* Semiannual.

*Total estimated burden:* 1,410 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$941,000 (per year), includes \$776,000 annualized capital or operation & maintenance costs.

*Changes in the Estimates:* There is an increase in burden from the most recently approved ICR due to an adjustment. The change in the burden and cost estimates occurred because the standard has been in effect for more than three years and the requirements are different during initial compliance as compared to on-going compliance. The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities following the October 1, 2017 final rule amendments. This includes purchasing monitoring equipment, conducting performance tests, and establishing recordkeeping systems. This ICR removes costs associated with initial compliance, including capital costs. This ICR instead reflects the on-going burden and costs for existing facilities. The adjustment increase in burden is due to an adjustment to the number of facilities conducting performance evaluations to reflect an annual average basis. This ICR reflects the burden for four facilities to conduct a performance evaluation at least once every

twelve calendar quarters or three years. Finally, this ICR more accurately reflects the average hours per response, based on the total burden hours divided by the total number of responses submitted by respondents. The previous ICR incorrectly allocated the total burden hours divided by the total number of respondents.
