value is calculated in accordance with section 773 of the Act. In addition, pursuant to sections 776(a) and (b) of the Act, Commerce has preliminarily relied on facts otherwise available, with adverse inferences, to determine the margin assigned to Southern PC Steel Sdn. Bhd. For a full description of the methodology underlying the preliminary determination, see the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(A)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and de minimis margins, and any margins determined entirely under section 776 of the Act.

Commerce calculated individual estimated weighted-average dumping margins for the two producers/exporters participating in this investigation, Kiswire Sdn. Bhd. (Kiswire) and Wei Dat Steel Wire Sdn. Bhd. (Wei Dat) that are not zero, de minimis, or based entirely on facts otherwise available. Commerce calculated the all-others’ rate using a weighted average of the estimated weighted-average dumping margins calculated for the individually examined mandatory respondents using each company’s publicly ranged values for the merchandise under consideration. 6

---

6 With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company’s publicly-ranged U.S. sale values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for producers and exporters not subject to individual examination. See Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part, 75 FR 53661, 53663 (September 1, 2010). For a complete analysis of the data, see Memorandum, “Preliminary Determination Calculation for the ‘All-Others’ Rate,” dated concurrently with, and hereby adopted by, this notice.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the Federal Register. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure
Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce is currently unable to conduct on-site verification of the information relied upon in making its final determination in this investigation. Accordingly, we intend to take additional steps in lieu of on-site verification. Commerce will notify interested parties of any additional documentation or information required. Because Southern PC Steel Sdn. Bhd did not provide information requested by Commerce, and Commerce preliminarily determines Southern PC Steel Sdn. Bhd to have been uncooperative, we will not conduct verification of Southern PC Steel Sdn. Bhd.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until
not later than 135 days after the date of the publication of the preliminary determination if, in the
event of an affirmative preliminary determination, a request for such postponement is made by
exporters who account for a significant proportion of exports of the subject merchandise, or in
the event of a negative preliminary determination, a request for such postponement is made by
the petitioner. Section 351.210(e)(2) of Commerce’s regulations requires that a request by
exporters for postponement of the final determination be accompanied by a request for extension
of provisional measures from a four-month period to a period not more than six months in
duration.

On November 3 and 9, 2020, pursuant to 19 CFR 351.210(e), Wei Dat and Kiswire
requested that Commerce postpone the final determination and that provisional measures be
extended to a period not to exceed six months.⁹ In accordance with section 735(a)(2)(A) of the

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is prestressed concrete steel wire strand (PC strand), produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475.

The PC strand subject to this investigation is currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.
