**SUPPLEMENTARY INFORMATION:**

*I. Abstract*

The NMFS Southeast Regional Office manages three commercial individual fishing quota (IFQ) and individual transferable quota (ITQ) programs in the Southeast Region under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.* The IFQ programs for red snapper, and groupers and tilefishes occur in Federal waters of the Gulf of Mexico (Gulf), and the ITQ program for wreckfish occurs in Federal waters of the South Atlantic.

The NMFS Southeast Regional Office proposes to extend and revise parts of the information collection currently approved under OMB Control Number 0648-0551. This collection of information tracks the transfer and use of IFQ and ITQ shares, and IFQ allocation and landings by commercial fishermen necessary for NMFS to operate, administer, and review management of the IFQ and ITQ programs. Regulations for the IFQ and ITQ programs are located at 50 CFR part 622.

For the Gulf IFQ programs, the revisions would collect additional business and demographic information on the IFQ Online Account Application, as well as add a requirement to input the vessel signature personal identification number (PIN) a second time on the Dealer Landing Transaction Report if a criterion is met. NMFS would make revisions to the IFQ Online Account Application to obtain ownership percentage data for any business that participates in the Gulf IFQ programs, as well as the type of business, and confirmation of whether the business is small or large, as defined by Small Business Administration standards. NMFS would revise the Dealer Landing Transaction Report to add a requirement for a shareholder to input the vessel signature PIN a second time if the landing transaction would result in a 10 percent overage of their catch allocation during that fishing year. NMFS proposes to add a feature to the Dealer Landing Transaction Report that would notify the shareholder that a 10 percent overage would occur and in which categories, and require the vessel signature PIN to accept the overage.

Although the 10 percent overage is utilized infrequently, this would provide the shareholder the opportunity to transfer allocation and avoid using the 10 percent overage.

The purpose of revising the IFQ Online Account Application is to better comply with National Standard 4 (NS4) of the Magnuson-Stevens Act, the Regulatory Flexibility Act (RFA), and the Small Business Administration's regulations implementing the RFA, Executive Order 12898, and the "fairness and equitable distribution" provisions of the Magnuson-Stevens Act, including NS4 and section 303(b)(6). The purpose of revising the Dealer Landing Transaction Report is to better inform participants in the Gulf IFQ programs and require an additional verification from them when the existing flexibility measure of a 10 percent overage of their allocation would occur.

If implemented by NMFS, these administrative revisions would slightly increase the estimated time per response to complete the IFQ Online Account Application. NMFS estimates the time per response would increase from 10 to 13 minutes. However, the estimated time per response for the Dealer Landing Transaction Report is not expected to change. The cost of both the IFQ Online Account Application and the Dealer Landing Transaction Report would remain the same. NMFS proposes no other revisions to the existing information collections for the IFQ and ITQ programs approved in OMB Control No. 0648-0551.

## *II. Method of Collection*

Information for the Gulf red snapper, and grouper and tilefish IFQ programs is collected electronically via a web-based system, through satellite-linked vessel monitoring systems, through a 24-hour call line, and with paper form submission for landing corrections, closing an account, and account applications, as well as landing transactions under catastrophic circumstances. The proposed revision would not change the methods currently used to collect information.

The share transfer process in the wreckfish ITQ program requires the signatures of witnesses on paper forms. The wreckfish ITQ program remains paper-based until the South

Atlantic Fishery Management Council and NMFS consider whether to implement an electronic system. NMFS is not proposing to change the wreckfish ITQ program or information collection.
