Abstract: Owners and operators of affected facilities are required to comply with reporting and recordkeeping requirements for the General Provisions (40 CFR Part 63, Subpart A), as well as the applicable standards at 40 CFR Part 63, Subpart W. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Epoxy resin and non-nylon polyamide resin production facilities.

Respondent's obligation to respond: Mandatory (40 CFR Part 63, Subpart W).

Estimated number of respondents: 7 (total).

Frequency of response: Initially, quarterly, and semiannually.

Total estimated burden: 3,940 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$476,000 (per year), which includes \$14,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no increase in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: 1) the regulations have not changed over the past three years, and they are not anticipated to change over the next three years; 2) the growth rate for this industry is either very low or non-existent, so there is no significant change in the overall burden. However, there is a slight increase in costs. The operation and maintenance (O&M) costs have been updated from 1998 dollars to 2019 dollars using the CEPCI CE Index.

Courtney Kerwin, Director, Regulatory Support Division.
