II. The Petitioner and the Petition

The petition for rulemaking (PRM) was filed by Richard Arnold and Ron Johnson on behalf of the Tribal Radioactive Materials Transportation Committee (TRMTC). The PRM requests that the NRC revise its regulations at part 37 of title 10 of the *Code of Federal Regulations* (10 CFR), “Physical protection of category 1 and category 2 quantities of radioactive material,” to ensure consistency with 10 CFR part 71, “Packaging and transportation of radioactive material,” and 10 CFR part 73, “Physical protection of plants and materials,” regarding advance Tribal notification of certain radioactive material shipments. The petition may be found in ADAMS at Accession ML21042B011.

III. Discussion of the Petition

The letter from the petitioner states, “TRMTC believes consistent notification standards must be applied to states and tribal governments...”. This letter identifies a discrepancy between 10 CFR part 37 and 10 CFR parts 71 and 73 regarding advance notification of Tribal Governments for certain radioactive material shipments. The NRC regulations in § 71.79, “Advance notification of shipment of irradiated reactor fuel and nuclear waste,” require licensees provide advance notification to the NRC, States, and participating Tribes for irradiated fuel and for the shipment of licensed material, other than irradiated fuel, meeting the certain conditions. The NRC regulations in § 73.37, “Requirements for physical protection of irradiated reactor fuel in transit,” require licensees provide advance notification to the NRC, States and participating Tribes for spent nuclear fuel. While § 37.77 requires licensees provide advance notice to the NRC and States for the shipment of licensed material in a category 1 quality, there is no requirement for licensees to provide advance notification to Tribes for such shipments.

IV. Conclusion

The NRC has determined that the petition meets the sufficiency requirements for docketing a PRM under § 2.803, "Petition for rulemaking-NRC action." The NRC will examine the issues raised in PRM-37-2 and any comments received in response to this comment request to determine whether these issues should be considered in rulemaking.

Dated: April 5, 2021.

For the Nuclear Regulatory Commission.

Annette L. Vietti-Cook,

Secretary of the Commission.
