[Docket No. CP19-502-001]

Commonwealth LNG, LLC; Notice of Application for Amendment and Establishing Intervention Deadline

Take notice that on July 8, 2021, Commonwealth LNG, LLC (Commonwealth), One Riverway, Suite 500, Houston, TX 77056, filed an application under section 3(a) of the Natural Gas Act (NGA) requesting an amendment to its August 20, 2019 application (2019 Application) requesting authorization from the Commission to site, construct, and operate a natural gas liquefaction and export facility (LNG Facility), including an NGA Section 3 natural gas pipeline in Cameron Parish, Louisiana. Commonwealth's LNG Facility, described in its 2019 Application included six 40,000 cubic meter full containment LNG Storage Tanks designed with an inner and outer tank fabricated from nine percent (9%) nickel steel which would have required a special authorization from the Department of Transportation, Pipeline and Hazardous Material Safety Administration (PHMSA). Commonwealth now plans to change the design of the LNG Storage Tanks to a traditional full-containment, modular-built, tank design with a nine percent (9%) nickel inner tank and a concrete outer tank with carbon steel liner which would not require a special authorization from the PHMSA. Commonwealth also proposes to increase the net capacity of the six LNG Storage Tanks from 40,000 to 50,000 cubic meters each (60,000 cubic meters total), for a new total working storage volume of 300,000 for the LNG Facility.
