SUPPLEMENTARY INFORMATION:

I. Background

These draft device-specific guidance documents provide performance criteria for premarket notification (510(k)) submissions to support the optional Safety and Performance Based Pathway, as described in the guidance entitled “Safety and Performance Based Pathway.” As described in that guidance, substantial equivalence is rooted in comparisons between new devices and predicate devices. However, the Federal Food, Drug, and Cosmetic Act does not preclude FDA from using performance criteria to facilitate this comparison. If a legally marketed device performs at certain levels relevant to its safety and effectiveness, and a new device meets those levels of performance for the same characteristics, FDA could find the new device as safe and effective as the legally marketed device. Instead of reviewing data from direct comparison testing between the two devices, FDA could support a finding of substantial equivalence with data demonstrating the new device meets the level of performance of an appropriate predicate device(s). Under this optional Safety and Performance Based Pathway, a submitter could satisfy the requirement to compare its device with a legally marketed device by,

among other things, independently demonstrating that the device's performance meets performance criteria as established in the above-listed guidance documents, when finalized, rather than using direct predicate comparison testing for some of the performance characteristics.

These draft guidance documents are being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). These draft guidance documents, when finalized, will represent the current thinking of FDA on performance criteria for the Safety and Performance Based Pathway for "Denture Base Resins" and "Facet Screw Systems." They do not establish any rights for any person and are not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access
