k. Description of Request: The licensee requests a temporary variance of the minimum flow requirements at three project locations, including North Fork Battle Creek below North Battle Creek Dam, North Fork Battle Creek below Macumber Reservoir, and Battle Creek below Coleman Powerhouse. Specifically, the licensee requests Commission approval to reduce flows below North Battle Creek Reservoir and Macumber Reservoir from a 0.3 cubic feet per second (cfs) instantaneous requirement to a 24-hour average flow. Similarly, the licensee proposes to reduce flows in Battle Creek from a 150 cfs instantaneous minimum flow to a 24-hour average flow. The licensee states that the flow modification would conserve limited water resources during the current drought conditions and to maintain reservoir elevation and water quality in project reservoirs. The licensee requests the variance through October 31, 2021.
