DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2022-N-1886]

Agency Information Collection Activities; Proposed Collection; Comment Request; Endorser Status and Actual Use in Direct-to-Consumer Television Ads

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the Federal Register concerning each proposed collection of information and to allow 60 days for public comment in response to the notice. This notice solicits comments on a proposed study entitled “Endorser Status and Actual Use in Direct-to-Consumer Television Ads.”

DATES: Submit either electronic or written comments on the collection of information by [INSERT DATE 60 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER].

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before [INSERT DATE 60 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]. The https://www.regulations.gov electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of [INSERT DATE 60 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.
Electronic Submissions

Submit electronic comments in the following way:

- Federal eRulemaking Portal: https://www.regulations.gov. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to https://www.regulations.gov will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on https://www.regulations.gov.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- Mail/Hand delivery/Courier (for written/paper submissions): Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2022-N-1886 for “Agency Information Collection Activities; Proposed Collection; Comment Request; Endorser Status and Actual Use in Direct-to-Consumer Television Ads.” Received comments,
those filed in a timely manner (see ADDRESSES), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at https://www.regulations.gov or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- Confidential Submissions--To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on https://www.regulations.gov. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to https://www.regulations.gov and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.
FOR FURTHER INFORMATION CONTACT: Regarding the collection of information:
JonnaLynn Capezzuto, Office of Operations, Food and Drug Administration, Three White Flint
North, 10A-12M, 11601 Landsdown St., North Bethesda, MD 20852, 301-796-3794,
PRASstaff@fda.hhs.gov.

For copies of the questionnaire: Amie O'Donoghue, Office of Prescription Drug Promotion
(OPDP) Research Team, DTCresearch@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501-3521), Federal
Agencies must obtain approval from the Office of Management and Budget (OMB) for each
collection of information they conduct or sponsor. “Collection of information” is defined in 44
U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that
members of the public submit reports, keep records, or provide information to a third party.
Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to
provide a 60-day notice in the Federal Register concerning each proposed collection of
information before submitting the collection to OMB for approval. To comply with this
requirement, FDA is publishing notice of the proposed collection of information set forth in this
document.

With respect to the following collection of information, FDA invites comments on these
topics: (1) whether the proposed collection of information is necessary for the proper
performance of FDA’s functions, including whether the information will have practical utility;
(2) the accuracy of FDA’s estimate of the burden of the proposed collection of information,
including the validity of the methodology and assumptions used; (3) ways to enhance the quality,
utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the
collection of information on respondents, including through the use of automated collection
techniques, when appropriate, and other forms of information technology.

Endorser Status and Actual Use in Direct-to-Consumer Television Ads

OMB Control Number 0910--NEW
Section 1701(a)(4) of the Public Health Service Act (42 U.S.C. 300u(a)(4)) authorizes FDA to conduct research relating to health information. Section 1003(d)(2)(C) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 393(d)(2)(C)) authorizes FDA to conduct research relating to drugs and other FDA-regulated products in carrying out the provisions of the FD&C Act.

The mission of the OPDP is to protect the public health by helping to ensure that prescription drug promotional material is truthful, balanced, and accurately communicated. OPDP’s research program provides scientific evidence to help ensure that our policies related to prescription drug promotion will have the greatest benefit to public health. Toward that end, we have consistently conducted research to evaluate the aspects of prescription drug promotion that are most central to our mission, focusing in particular on three main topic areas: advertising features, including content and format; target populations; and research quality. Through the evaluation of advertising features, we assess how elements such as graphics, format, and the characteristics of the disease and product impact the communication and understanding of prescription drug risks and benefits. Focusing on target populations allows us to evaluate how understanding of prescription drug risks and benefits may vary as a function of audience, and our focus on research quality aims at maximizing the quality of research data through analytical methodology development and investigation of sampling and response issues. This study will inform the first topic area, advertising features.

Because we recognize that the strength of data and the confidence in the robust nature of the findings are improved through the results of multiple converging studies, we continue to develop evidence to inform our thinking. We evaluate the results from our studies within the broader context of research and findings from other sources, and this larger body of knowledge collectively informs our policies as well as our research program. Our research is documented on our home page at https://www.fda.gov/about-fda/center-drug-evaluation-and-research-
The objective of the present research is to conduct experimental studies to examine issues related to endorsers in DTC prescription drug promotion. This study complements one that is currently in progress (FDA-2019-N-5900, OMB control number 0910-0894, Expiration Date: February 29, 2024). As that study examined a number of different endorser types in print or internet settings and focused on examining how various disclosures of the payment status of the endorser influenced audience reactions, this proposed research extends the prior research by examining actual-use disclosures and a different medium, television ads. Prior research has shown that endorsements by expert physicians and pharmacists were the most likely to lead to purchase intentions, followed by endorsements by consumers, and lastly, by celebrities (Refs. 1 and 2).

For healthcare providers (HCPs) endorsing a prescription drug product, guiding industry principles advise that advertisements should contain a disclosure that the HCP has been compensated for the endorsement (Ref. 3). Industry guiding principles further recommend that an advertisement disclose when an actor is being used as an HCP to promote direct-to-consumer (DTC) prescription drugs.

Pharmaceutical firms also often use everyday people, either actual patients or actors portraying patients, in DTC promotion, relying on qualities of identification with the individual endorsing the product and perceived credibility (Ref. 4). While industry guidelines recommend that companies choosing to feature actors in the roles of HCPs in a DTC television or print ad acknowledge in the ad that actors are being used, the guidelines do not mention disclosures that the “patient” in an ad is being portrayed by an actor (Ref. 3). Some advertisers endeavor to gain credibility among viewers by using actual patients to endorse the product, with a disclosure that states they are actual users of the product (“actual-use disclosure”) (Ref. 5).
The present research will specifically examine the influence of two independent variables—endorser type (patient, physician) and an actual-use disclosure (utilizer, actor, none)—in television advertisements. Dependent variables will include perceptions of the risks and benefits of the promoted prescription drug, attitudes toward and perceptions of the endorser, attention paid to the ad, and behavioral intentions. Because age and education level may affect perceptions of the ad, we plan to explore whether age and education level influence these effects.

This research will involve two studies. Studies 1 and 2 will use a 2×3 factorial design run concurrently and independently with a sample of consumers who have been diagnosed with diabetes (Study 1) or rheumatoid arthritis (Study 2), each watching a DTC television ad for a fictitious drug indicated to treat the corresponding medical conditions. The ad will be manipulated to assess the impact of two categories of commonly used industry spokespeople: a patient and a physician. We will test three actual-use disclosure conditions: (1) an actual-use disclosure that indicates that the endorser either uses or prescribes the prescription drug in real life (i.e., utilizer), (2) an actual-use disclosure that specifies the endorser is an actor, and (3) a control with no actual-use disclosure. The design for Studies 1 and 2 is presented in table 1.

</tr>
</tbody>
</table>

In both studies, participants will be randomly assigned to one of six experimental conditions (see table 1), view their assigned stimulus, complete a survey, and provide feedback on one of the other ad versions. We will conduct pretests with 126 consumers who self-identify as having been diagnosed with diabetes and 126 consumers who self-identify as having been diagnosed with rheumatoid arthritis, recruited from a web-based research vendor. For the main study, we will then recruit 648 consumers who self-identify as having been diagnosed with diabetes and 648 consumers who self-identify as having been diagnosed with rheumatoid
Each participant will see one of six versions of a television ad for a fictitious prescription diabetes or rheumatoid arthritis treatment, as reflected in table 1. They will answer a questionnaire designed to take no more than 20 minutes.

FDA estimates the burden of this collection of information as follows:

1 There are no capital costs or operating and maintenance costs associated with this collection of information.
2 Burden estimates of less than 1 hour are expressed as a fraction of an hour in the format “[number of minutes per response]/60.”
