Advisory Committee Open Session on Management Strategy Evaluation for North Atlantic Swordfish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of meeting.

SUMMARY: NMFS is holding a public meeting via webinar session for the Advisory Committee to the U.S. Section to the International Commission for the Conservation of Atlantic Tunas (ICCAT) and all interested stakeholders to receive an update and provide input on the development of the management strategy evaluation (MSE) for North Atlantic swordfish.

DATES: A virtual meeting that is open to the public will be held by webinar session on June 16, 2023, from 3 p.m. to 5 p.m. EDT.

ADDRESSES: Please register to attend the meeting at:

<https://forms.gle/EeMbS76EHZ5s5CQg7>. Registration will close on June 14, 2023, at 5 p.m. EDT. Instructions for accessing the webinar session will be emailed to registered participants.

FOR FURTHER INFORMATION CONTACT: Bryan Keller, Office of International Affairs, Trade, and Commerce, (202) 897-9208 or at Bryan.Keller@noaa.gov.

SUPPLEMENTARY INFORMATION: MSE is a process that allows fishery managers and stakeholders (*e.g.*, industry, scientists, and non-governmental organizations) to assess how well different strategies achieve specified management objectives for a fishery. ICCAT expects to finalize its North Atlantic swordfish MSE in 2023 and anticipates

adopting a management procedure in November 2023 to set the total allowable catch for 2024 and future years for the stock. NMFS, and the United States Government more broadly, engages in this MSE development, an important part of which involves considering stakeholder input throughout the process through various means, including consultation with the Advisory Committee to the U.S. Section to ICCAT. The United States is also participating in the development of the North Atlantic swordfish MSE through the active involvement of U.S. scientists in the scientific work carried out by ICCAT's Standing Committee on Research and Statistics (SCRS).

The June 16 meeting is intended to update U.S. stakeholders and solicit their input on the MSE approach being developed by ICCAT for North Atlantic swordfish. NMFS will provide information on the progress of the SCRS in developing initial candidate management procedures (CMPs) and testing them based on initial input on management objectives and other relevant matters from ICCAT's Panel 4. CMPs illustrate tradeoffs associated with achieving identified management objectives related to stock status, stock safety, yield, and catch stability over time. CMP testing assists ICCAT in refining management objectives and narrowing the number of viable CMPs for possible adoption by the Commission. This open session Advisory Committee meeting is primarily informational in nature and is intended to increase the opportunity for stakeholder awareness and input on the North Atlantic swordfish MSE process. Discussions at the meeting will help inform U.S. scientists who are participating in the work of the SCRS as well as U.S. managers participating in relevant Commission related meetings later in 2023 addressing the North Atlantic swordfish MSE.

Authority: 16 U.S.C. 971 *et seq.*; 16 U.S.C. 1801 *et seq.*

Dated: May 22, 2023.

Alexa Cole,

Director, Office of International Affairs, Trade, and Commerce,
National Marine Fisheries Service.
