**SUPPLEMENTARY INFORMATION:**

*Description:* The Child Abuse Prevention and Treatment Act (CAPTA) was amended in 1988 to direct the Secretary of HHS to establish a national data collection and analysis program, which would make available state child abuse and neglect reporting information. HHS responded by establishing NCANDS as a voluntary national reporting system.

During 1996, CAPTA was amended to require all states that receive funds from the Basic State Grant program to work with the Secretary of HHS to provide specific data elements, to the maximum extent practicable, about children who had been maltreated. Most of the required data elements were added to the NCANDS data collection. Subsequent CAPTA reauthorizations and amendments added

required data elements. The current list of CAPTA required data elements includes:

- 1) The number of children who were reported to the state during the year as victims of child abuse or neglect.
- 2) Of the number of children described in paragraph (1), the number with respect to whom such reports were-
  - a) Substantiated;
  - b) Unsubstantiated; or
  - c) Determined to be false.
- 3) Of the number of children described in paragraph (2)-
  - a) the number that did not receive services during the year under the state program funded under this section or an equivalent state program;
  - b) the number that received services during the year under the state program funded under this section or an equivalent state program; and
  - c) the number that were removed from their families during the year by disposition of the case.
- 4) The number of families that received preventive services, including use of differential response, from the state during the year.

8) The agency response time with respect to each such report with respect to initial investigation of reports of child abuse or neglect.

9) The response time with respect to the provision of services to families and children where an allegation of child abuse or neglect has been made.

10) For child protective service personnel responsible for intake, screening, assessment, and investigation of child abuse and neglect reports in the state—

d) information on caseload or workload requirements for such personnel, including requirements for average number and maximum number of cases per child protective service worker and supervisor.

11) The number of children reunited with their families or receiving family preservation services that, within five years, result in subsequent substantiated reports of child abuse or neglect, including the death of the child.
