Description

Accession 58

In 1972, human remains representing, at minimum, one individual were removed from site CA-BUT-478, in Butte County, CA. This site was uncovered by Makato Kowta of California

State University, Chico during an orchard-leveling operation. The 127 associated funerary objects are one modified stone, one modified flake, one grinding stone, two hammerstones, one pestle, one projectile point, and 120 soil samples.

Cultural affiliation

The human remains and associated funerary objects in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: anthropological, archeological, historical, and expert opinion.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, CSU Chico has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The 127 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary objects described in this notice and the Berry Creek Rancheria of Maidu Indians of California.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after [INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE **FEDERAL REGISTER**]. If competing requests for repatriation are received, CSU Chico must determine the most appropriate requestor prior to repatriation.
