Mother and Infant Home Visiting Program Evaluation: Long-Term Follow-Up, Third grade data collection (Office of Management and Budget #0970-0402)

AGENCY: Office of Planning, Research, and Evaluation, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families (ACF), in partnership with the Health Resources and Services Administration, both of the U.S. Department of Health and Human Services (HHS), is proposing to collect data as part of the elementary school phase of the Mother and Infant Home Visiting Program Evaluation (MIHOPE). MIHOPE is a longitudinal study of the effects of Maternal, Infant, and Early Childhood Home Visiting (MIECHV)-funded home visiting on child and family outcomes. The purpose of the MIHOPE Long-Term Follow-Up, Third grade (MIHOPE-3G) data collection, which will focus on children when they are in approximately third grade, is to assess the long-term effects of MIECHV-funded home visiting on families and children when participating children are in elementary school.

SUPPLEMENTARY INFORMATION:

Description: To date, MIHOPE has been collecting data through the time children in the study were in approximately kindergarten. The currently approved materials under this OMB number include those for the kindergarten follow-up. The kindergarten direct data collection with study participants is complete, but some administrative data are still being collected from states and local education agencies.

This request is to complete administrative data collection for the kindergarten follow-up and to conduct the following data collection activities for MIHOPE-3G: (1) child welfare records data collection from states and (2) school records data collection from states and local education agencies. Future information collection requests and related *Federal Register* notices will describe future data collection efforts for this project.

Data collected during the third grade follow-up study is being used to estimate the effects of MIECHV-funded programs on the following seven domains: (1) maternal health, (2) child health, (3) child development and school performance, (4) child maltreatment, (5) parenting, (6) crime or domestic violence, and (7) family economic self-sufficiency.

Respondents: For MIHOPE-3G, we will seek to obtain child welfare data from 11 states and school records data from up to 48 states and local education agencies. This data will be collected for 4,105 families who are currently participating in MIHOPE.
