Abstract: Under the Clean Air Act (42 U.S.C. 7521 et seq.) manufacturers and importers of on-highway motorcycles must have a certificate of conformity issued by EPA covering any vehicle they intend to offer for sale in the United States. A certificate of conformity represents that the

respective vehicle conforms to all applicable emissions requirements. In issuing a certificate of conformity, EPA reviews vehicle information and emissions test data to determine if the required testing has been performed and the required emissions levels have been demonstrated. After a certificate of conformity has been issued, the Agency may request additional information to verify that the product continues to meet its certified emissions standards throughout its useful life.

Respondents/affected entities: Entities potentially affected by this action are on-highway motorcycle manufacturers and importers.

Respondent's obligation to respond: Mandatory (40 CFR part 86)

Estimated number of respondents: 95 (total).

Frequency of response: Annual, unless otherwise specified under 40 CFR part 86, subpart E.

Total estimated burden: 5832 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$1,124,869 (per year), includes \$31,998 annualized capital and \$342,565 operation & maintenance costs.

Changes in Estimates: There is an increase of 379 hours but a decrease of \$63,760 in the total estimated cost from the previous ICR. This increase in hours but decrease in total estimated cost is primarily due to the inclusion of electric motorcycle manufacturers who must certify their engine families but are not subject to exhaust or evaporative emissions testing requirements.
