SUPPLEMENTARY INFORMATION:

Title: FERC-521, Payments for Benefits from Headwater Improvements

OMB Control No.: 1902-0087

Type of Request: Three-year extension of the FERC-521 information collection requirements with no changes to the reporting requirements.

Abstract: The purpose of FERC-521 is to implement the information collection regarding “headwater benefits” pursuant to section 10(f) of the Federal Power Act (FPA).¹ As defined at 18 CFR 11.10(a)(2), headwater benefits consist of the additional electric generation of a downstream project that results from regulation of the flow of a river by a headwater (i.e. upstream) project, usually by increasing or decreasing the release of water from a storage reservoir. The respondents of this information collection are owners of headwater projects constructed by the United States, by licensees, and pre-1920 permittees. 18 CFR 11.16(b). The Commission requires basic project information including owner information, location, and storage capacity to be filed by the respondents.

Type of Respondents: There are two types of entities that respond, Federal and Non-Federal storage and hydropower project owners. The Federal entities that typically respond include the U.S. Army Corps of Engineers and the U.S. Department of Interior Bureau of Reclamation. The Non-Federal entities may consist of any Municipal or Non-Municipal hydropower project owner.

Estimate of Annual Burden² and cost³: The Commission estimates the total Public Reporting Burden for this information collection as:

¹ 16 U.S.C. 803(f).

² Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 Code of Federal Regulations 1320.3.

³ The estimates for cost per response are derived using the 2022 FERC average salary plus benefits of \$188,922/year (or \$91.00/hour). Commission staff finds that the work done for this information collection is typically done by wage categories similar to those at FERC.

Federal and Non-Federal project owners	3	1	3	40 hrs.; \$3,640	120 hrs.; \$10,920	\$3,640

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: August 3, 2023.
