Abstract: The National Estuary Program (NEP) involves collecting information from the state or local entity or nongovernmental organization that receives funds under section 320 of the Clean Water Act (CWA). The regulation requiring this information is found in 40 CFR part 35.

Prospective grant recipients seek funding to develop and coordinate the implementation of Comprehensive Conservation Management Plans (CCMPs) for estuaries of national significance. To receive funds, grantees must submit annual work plans to EPA, which are used to track performance of each of the 28 estuary program locations currently in the NEP. EPA

provides funding to the 28 NEPs to support long-term implementation of CCMPs in the form of assistance agreements, and each NEP is evaluated on its progress every five years. The primary purpose of the program evaluation process is to help EPA determine whether the 28 programs included in the NEP are making adequate progress implementing their CCMPs. EPA also requests that each of the 28 NEPs receiving section 320 funds report annually on performance measures that allow EPA to maintain effective program management, execute its fiduciary responsibility to the program, and summarize environmental results achieved within the overall NEP. Information gathered may be included in agency reports along with other EPA program measures.

The passage of the Infrastructure Investment and Jobs Act, also known as Bipartisan Infrastructure Law (BIL), on November 15, 2021, enhances the work of the NEPs with additional funding to accelerate and more extensively implement CCMPs, ensure that benefits reach disadvantaged communities, and build the adaptive capacity of ecosystems and communities. As part of this expanded investment, the NEP is also required to track certain investments and benefits under the Justice40 Initiative (part II section 223 of 86 FR 7619), which will be informed by equity strategies submitted on a one-time basis by each of the 28 NEPs. These additional requirements under BIL and Justice40 contribute to the significant increase in the overall burden estimates for this renewal.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are those state or local entities or nongovernmental organizations in the NEP that receive assistance agreements under section 320 of the Clean Water Act.

Respondent's obligation to respond: Required to obtain or retain a benefit (section 320 of the Clean Water Act).

Estimated number of respondents: 28 (total).

Frequency of response: Annual.

Total estimated burden: 11,872 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$763,844 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is increase of 6,512 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to 1) year-end reporting of activities and accomplishments in Work Plans; 2) Program Evaluations taking place in the next three years compared to two years in the currently approved ICR; 3) expanded reporting of existing information collection (Work Plans, Program Evaluation Packages, Performance Measures) under BIL; and 4) requirement to develop Equity Strategies designed to meet expectations under the Justice40 Initiative, as well as to waive the remaining NEP non-federal match/cost-share requirements for BIL funds in FY2024 – FY2026.
