Abstract:

The Bird Banding Program is the responsibility of the USGS Bird Banding Laboratory (BBL). The BBL plays a critical role in permitting the banding and marking of wild birds and is responsible for storing and maintaining data on banded and marked birds. This effort requires coordination between banders and people who later encounter the marked birds to ensure the data are available for later analyses.

To achieve these goals, the BBL collects information using three forms: (1) The Application for Federal Bird Banding or Marking Permit, (2) The Federal Bird Banding or Marking Permit Renewal Form, and (3) The Bird Banding Recovery Report.
