[Project No. 3211-010]

Power Authority of the State of New York; Notice of Availability of Draft Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Hinckley (Gregory B. Jarvis) Hydroelectric Project (Jarvis Project). The Jarvis Project is located on West Canada Creek, near the Hamlet of Hinckley in the counties of Oneida and Herkimer, New York.

On June 27, 2022, the Commission issued a notice indicating that staff intended to prepare a multi-project Environmental Assessment (EA) for both the Jarvis Project and Erie Boulevard Hydropower, L.P.'s West Canada Creek Hydroelectric Project, because the projects are located adjacent to each other. However, the Fiscal Responsibility Act of 2023 now requires that an EA "shall not exceed 75 pages, not including any citations or appendices" (Fiscal Responsibility Act of 2023, Pub. L. No. 118-5, 107, 137 Stat 42 (2023)). A multi-project EA would have exceeded the page limit established in the Act, so staff has prepared a stand-alone draft Environmental Assessment (EA) for the Jarvis Project.

The draft EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the draft EA via the Internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link.
