- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Abstract: The proposed generic information collection clearance will enable the National Institute of Justice (NIJ), on behalf of the Office of Juvenile Justice and Delinquency Prevention (OJJDP), to develop, test, and improve its survey and data collection instruments and methodologies. NIJ will engage in cognitive, pilot, and field test activities to inform its data collection efforts and to minimize respondent burden associated with each new or modified data collection. NIJ anticipates using a variety of procedures including, but not limited to, tests of various types of survey and data collection operations, focus groups, cognitive laboratory activities, pilot testing, field testing, exploratory interviews, experiments with questionnaire design, and usability testing of electronic data collection instruments. Following standard Office of Management and Budget (OMB) requirements, NIJ will submit an individual request to OMB for every group of data collection activities undertaken under this generic clearance. NIJ will provide OMB with a copy of the individual instruments or questionnaires (if one is used), as well as other materials describing the project.
