SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “Stimulant Use Disorders: Developing Drugs for Treatment.” The purpose of this draft guidance is to assist sponsors in the clinical development of drugs for the treatment of stimulant use disorders. This draft guidance is intended to serve as a focus for continued discussions among the Division of Anesthesiology, Addiction Medicine, and Pain Medicine, pharmaceutical sponsors, the academic community, and the public. This draft guidance does not address treatment of intoxication or poisoning with various stimulants or treatment of withdrawal from stimulants.

Because FDA has yet to approve any medication treatments for stimulant use disorders, this guidance reflects current recommendations based on a number of uncertainties about the best approach for treating stimulant use disorders and the best approach for evaluating response to treatment. FDA is engaged in an ongoing process to learn more about stimulant use disorders and their treatments to provide the best possible advice to sponsors.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on “Stimulant Use Disorders: Developing Drugs for Treatment.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.
