PETITION FOR EXEMPTION

Docket No.: FAA-2023-0753

Petitioner: Global Aviation Technologies

Section(s) of 14 CFR Affected: § 23.775(h)(1)

Description of Relief Sought: The petitioner has requested relief from § 23.775(h)(1), which requires that, for commuter category airplanes, windshield panes and their supporting structures must withstand, without penetration, the impact of a two-pound bird when the velocity of the airplane (relative to the bird along the airplane's flight path) is equal to the airplane's maximum approach flap speed. The requested relief is for the Textron Model 390 airplane, Type Certificate A00010WI, which was certified as normal category. The petitioner's project would increase the gross weight of the airplane which would necessitate compliance with the requirements for commuter category airplanes.
