National Oceanic and Atmospheric Administration

50 CFR Part 635

[Docket No. 220919-0193]

RTID 0648-XD387

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries; Closure of the General Category October through November Fishery for 2023

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and
Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS closes the General category fishery for large medium and giant (*i.e.*, measuring 73 inches (185 cm) curved fork length or greater) Atlantic bluefin tuna (BFT) for the remainder of the October through November time period. This action applies to Atlantic Tunas General category (commercial) permitted vessels and highly migratory species (HMS) Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT. This action also waives the previously-scheduled restricted-fishing days (RFDs) for the remainder of the October through November time period. With the RFDs waived during the closure, fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag and release BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs. On December 1, 2023, the fishery will reopen automatically.

DATES: Effective 11:30 p.m., local time, October 9, 2023, through November 30, 2023.

FOR FURTHER INFORMATION CONTACT: Lisa Crawford,

lisa.crawford@noaa.gov, 301-427-8503; or Larry Redd, Jr., *larry.redd@noaa.gov*, 301-427-8503.

SUPPLEMENTARY INFORMATION: Atlantic HMS fisheries, including BFT fisheries, are managed under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*). The 2006 Consolidated Atlantic HMS Fishery Management Plan (FMP) and its amendments are implemented by regulations at 50 CFR part 635. Section 635.27 divides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated HMS FMP and its amendments. NMFS is required under the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest quotas under relevant international fishery agreements such as the ICCAT Convention, which is implemented domestically pursuant to ATCA.

As described in § 635.27(a), the current baseline U.S. BFT quota is 1,316.14 metric tons (mt) (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area). The current baseline quota for the General category is 710.7 mt. The General category baseline quota is suballocated to different time periods. Relevant to this action, the baseline subquota for the October through November time period is 92.4 mt. Effective September 28, 2023, NMFS transferred 25 mt from the Reserve category to the General category, resulting in an adjusted October through November time period subquota of 117.4 and 87.2 mt for the Reserve category (88 FR 67654, September 28, 2023).

Under § 635.28(a)(1), NMFS files a closure action with the Office of the Federal Register for publication when a BFT quota (or subquota) is reached or is projected to be reached. Retaining, possessing, or landing BFT under that quota category is prohibited on

or after the effective date and time of a closure notice for that category until the opening of the relevant subsequent quota period or until such date as specified.

Closure of the October through November 2023 General Category Fishery

To date, reported landings for the General category October through November time period total approximately 60.1 mt. Based on these landings, NMFS has determined that the adjusted October through November time period subquota of 117.4 mt is projected to be reached and exceeded shortly. Therefore, retaining, possessing, or landing large medium or giant (*i.e.*, measuring 73 inches (185 cm) curved fork length or greater) BFT by persons aboard vessels permitted in the Atlantic Tunas General category and HMS Charter/Headboat permitted vessels (while fishing commercially) must cease at 11:30 p.m. local time on October 9, 2023. This action applies to Atlantic Tunas General category (commercial) permitted vessels and HMS Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT and is taken consistent with the regulations at § 635.28(a)(1). The General category will automatically reopen December 1, 2023, for the December 2023 time period with a retention limit of one large medium or giant BFT per vessel per day/trip.

Adjustment of Daily Retention Limit for Selected Dates

On May 25, 2023 (88 FR 33839), NMFS published a final rule implementing RFDs every Tuesday, Friday, and Saturday from July 1 through November 30, 2023. Since the fishery will be closed for the remainder of the October through November time period, NMFS waives the previously-scheduled RFDs for the remainder of that time period.

With the RFDs waived during the closure, consistent with § 635.23(a)(4), fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag and release BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs at § 635.26. All BFT that are released

must be handled in a manner that will maximize their survival, and without removing the fish from the water, consistent with requirements at § 635.21(a)(1). For additional information on safe handling, see the “Careful Catch and Release” brochure available at <https://www.fisheries.noaa.gov/resource/outreach-and-education/careful-catch-and-release-brochure/>.

Monitoring and Reporting

NMFS will continue to monitor the BFT fisheries closely. Dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS’ ability to timely implement actions such as quota and retention limit adjustments, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General and HMS Charter/Headboat category vessel owners are required to report the catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing <https://www.hmspermits.noaa.gov>, using the HMS Catch Reporting app, or calling 888-872-8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

After the fishery reopens on December 1, depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional adjustments are necessary to ensure available subquotas are not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas. If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may access <https://www.hmspermits.noaa.gov>, for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act and regulations at 50 CFR part 635 and is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and opportunity to provide comment on this action, as notice and comment would be impracticable and contrary to the public interest for the following reasons. Specifically, the regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments and fishery closures to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Providing for prior notice and an opportunity to comment is impracticable and contrary to the public interest as this fishery is currently underway and, based on landings information, the available time period subquota is projected to be reached shortly. Delaying this action could result in BFT landings exceeding the October through November time period subquota. Taking this action does not raise conservation or management concerns. NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota and the inseason adjustment criteria.

For all of the above reasons, the AA also finds that pursuant to 5 U.S.C. 553(d), there is good cause to waive the 30-day delay in effective date.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: October 6, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries,

National Marine Fisheries Service.
