

## **DEPARTMENT OF HEALTH AND HUMAN SERVICES**

### **Substance Abuse and Mental Health Services Administration**

#### **Agency Information Collection Activities: Submission for OMB Review; Comment**

##### **Request**

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer at (240) 276-0361.

##### **Project: SAMHSA Generic Clearance for the Collection of Qualitative Research and Assessment**

SAMHSA is requesting approval from the Office of Management and Budget (OMB) for their Generic clearance for purposes of conducting qualitative research. SAMHSA conducts qualitative research to gain a better understanding of emerging substance use and mental health policy issues, improve the development and quality of instruments, and to ensure SAMHSA leadership, centers and offices have recent data and information to inform program and policy decision-making. SAMHSA is requesting approval for at least four types of qualitative research: (a) interviews, (b) focus groups, (c) questionnaires, and (d) other qualitative methods.

SAMHSA is the agency within the U.S. Department of Health and Human Services (HHS) that leads public health efforts to advance the behavioral health of the nation and to improve the lives of individuals living with mental and substance use disorders, and their families. It's mission is to lead public health and service delivery efforts that promote mental health, prevent substance misuse, and provide treatments and supports to foster recovery while ensuring equitable access and better outcomes. SAMHSA pursues this mission by providing grant funding opportunities and guidance to states and territories, as well as tribal and local communities; technical assistance to grantees and practitioners; publishing and sharing resources for individuals and

family members seeking information on prevention, harm reduction, treatment and recovery; collecting, analyzing, and sharing behavioral health data; collaborating with other Federal agencies to evaluate programs and improve policies; and raising awareness of available resources through educational messaging campaigns and events.. Integral to this role, SAMHSA conducts qualitative research and evaluation studies, develops policy analyses, and estimates the cost and benefits of policy alternatives for SAMHSA related programs.

The goal of establishing the SAMHSA Generic Clearance for the Collection of Qualitative Research and Assessments is to help public health officials, policymakers, community practitioners, and the public to understand mental health and substance use trends and how they are evolving; inform the development and implementation of targeted evidence-based interventions; focus resources where they are needed most; and evaluate the success of programs and policies. A key objective is to decrease the burden on stakeholders while expanding and improving data collection, analysis, evaluation, and dissemination. To achieve this objective, SAMHSA is streamlining and modernizing data collection efforts, while also coordinating evaluation across the agency to ensure funding and policies are data driven. Additionally, the agency is utilizing rigorous evaluation and analytical processes that are in alignment with the Foundations for Evidence-Based Policymaking Act of 2018. SAMHSA, using robust methods to collect, analyze, and report valid, reliable, trustworthy, and protected data, is key to improving and impacting behavioral health treatment, prevention, and recovery for communities most in need. By using rigorous methods, and improving the quality and completeness of program data, data can be disaggregated across different population groups to assess disparities within the behavioral health care system. SAMHSA's vision will be accomplished by better leveraging optimal data to inform the agency's policies and programs.

The qualitative research participants will include grant recipients; policy experts; national, state, and local public health representatives; human service, and healthcare providers; and representatives of other health organizations. A variety of instruments and platforms will be used

to collect information from respondents. The annual burden hours requested (15,000) are based on the number of collections we expect to conduct over the requested period for this clearance. The burden estimates were calculated based on the amount of IC submissions to the 0930-0393 Fast Track Generic Clearance for the Collection of Qualitative Feedback on the Substance Abuse and Mental Health Services Administration (SAMHSA) Service Delivery that are ineligible for OMB approval under it. This Generic information collection will provide a viable replacement option. Internal assessments of projected IC submission over the next three years estimate the burden hours for this information collection to be approximately half that of the 0930-0393 Fast Track Generic Clearance for the Collection of Qualitative Feedback on the Substance Abuse and Mental Health Services Administration (SAMHSA) Service Delivery.

**Estimated Annualized Burden Table**

Type of respondent	Form	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
SAMHSA internal and external stakeholders	Qualitative Research	15,000	1	1	15,000

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain) . Find this particular information collection by selecting "Currently under 30-day Review - Open for Public Comments" or by using the search function.
