Title: Metropolitan and Statewide and Nonmetropolitan Transportation Planning

OMB Control Number: 2132-0529

Background: The FTA and Federal Highway Administration (FHWA) jointly carry out the federal mandate to improve urban and rural transportation. 49 U.S.C. 5303 and 5304 and 23 U.S.C. 134 and 135 authorize the use of federal funds to assist Metropolitan Planning Organizations (MPOs), States, and local public bodies in developing transportation plans and programs to serve the transportation needs of urbanized areas over 50,000 in population and other areas of States outside of urbanized areas. The program provides funding and procedural requirements for multimodal transportation planning in metropolitan areas and states. Planning needs to be cooperative, continuous, and comprehensive, resulting in long-range plans and short-range programs reflecting transportation investment priorities. Eligible respondents include State Departments of Transportation (DOTs) and Metropolitan Planning Organizations (MPOs). Federal planning funds are first apportioned to State DOTs. State DOTs then allocate planning funding to MPOs. Funds are available for planning activities that (A) support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency; (B) increase the safety of the transportation system for motorized and nonmotorized users; (C) increase the security of the transportation system for motorized and nonmotorized users; (D) increase the accessibility and mobility of people and for freight; (E) protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth, housing, and economic development patterns; (F) enhance the integration and connectivity of the transportation system, across and between modes, for people and freight; (G) promote efficient system management and operation; (H) emphasize the preservation of the existing transportation system; and (I) improve the resiliency and reliability of the transportation system. Funds are apportioned to states by a formula that includes each state's urbanized area population in proportion to the total urbanized area population for the nation, as well as other factors. States can receive no less than .5 percent of the amount apportioned. These funds, in

turn, are sub-allocated by states to MPOs by a formula that considers each MPO's urbanized area population, their individual planning needs, and a minimum distribution.

Respondents: State Departments of Transportation and MPOs.

Estimated Annual Burden on Respondents: 11,693 hours for each of the 502 respondents.

Estimated Total Annual Burden: 5,869,921 hours.

Frequency: Annual.

Deputy Associate Administrator, Office of Administration.
