**Proposal under OMB Delegated Authority to Extend for Three Years, With Revision, the Following Information Collection**

*Collection title:* Market Risk Capital Rule.

*Collection identifier:* FR 4201.

*OMB control number:* 7100-0314.

*General description of collection:* The market risk rule, which requires banking organizations to hold capital to cover their exposure to market risk, is a component of the Board's regulatory capital framework, Regulation Q - Capital Adequacy of Bank Holding Companies, Savings and Loan Holding Companies, and State Member Banks (12 CFR part 217). The rule includes information collections that permit the Board to monitor the market risk profile of Board-regulated banking organizations that have significant market risk. These information collections provide current statistical data identifying market risk areas on which to focus onsite and offsite

examinations. They also allow the Board to assess the levels and components of each reporting institution's risk-based capital requirements for market risk and the adequacy of the institution's capital under the market risk rule.

*Proposed revisions:* The Board proposes to revise the FR 4201 information collection to account for a recordkeeping requirement in section 217.203(b)(2) of Regulation Q that had not been previously cleared by the Board. Section 217.203(b)(2) requires subject banking organizations to have a process for prudent valuation of their covered positions that includes policies and procedures on the valuation of positions, marking positions to market or to model, independent price verification, and valuation adjustments or reserves. The valuation process must consider, as appropriate, unearned credit spreads, close-out costs, early termination costs, investing and funding costs, liquidity, and model risk.

*Frequency:* Annual, quarterly, and on occasion.

*Respondents:* Bank holding companies, covered savings and loan holding companies,<sup>1</sup> U.S. intermediate holding companies of foreign banking organizations, and state member banks (collectively, banking organizations) that meet certain risk thresholds. The market risk rule applies to any such banking organization with aggregate trading assets and trading liabilities equal to (1) 10 percent or more of quarter-end total assets or (2) \$1 billion or more.

*Total estimated number of respondents:* 37.

*Total estimated change in burden:* 592.

*Total estimated annual burden hours:* 36,236.<sup>2</sup>

Board of Governors of the Federal Reserve System, November 29, 2023.
