

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[30Day-24-0621]

#### Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled “National Youth Tobacco Survey 2024-2026” to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on June 5, 2023 to obtain comments from the public and affected agencies. CDC received five comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

- (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (c) Enhance the quality, utility, and clarity of the information to be collected;
- (d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and
- (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review - Open for Public Comments" or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street, NW, Washington, DC 20503 or by fax to (202) 395-5806. Provide written comments within 30 days of notice publication.

#### Proposed Project

National Youth Tobacco Survey 2024-2026 (OMB Control No. 0920–0621, Exp. 1/31/2024) – Revision – National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

#### *Background and Brief Description*

Tobacco use is the leading cause of preventable disease and death in the United States, and nearly all tobacco use begins during youth and young adulthood. A limited number of health risk behaviors, including tobacco use, account for the overwhelming majority of immediate and long-term sources of morbidity and mortality. Because many health risk behaviors are established during adolescence, there is a critical need for public health programs directed towards youth, and for information to support these programs.

Since 2004, the Centers for Disease Control and Prevention (CDC) has periodically collected information about tobacco use among adolescents (National Youth Tobacco Survey (NYTS) 2004, 2006, 2009, 2011–2023 (OMB Control No. 0920–0621, Exp. 01/31/2024)). This surveillance activity builds on previous surveys funded by the American Legacy Foundation in 1999, 2000, and 2002. At present, the NYTS is the most comprehensive source of nationally representative tobacco-related data among students in grades 9–12, moreover, the NYTS is the

only source of such data for students in grades 6–8. The NYTS has provided national estimates of tobacco use behaviors, information about exposure to pro- and anti-tobacco influences, and information about tobacco-related racial and ethnic disparities. Information collected through the NYTS is used to identify trends over time, to inform the development of tobacco cessation programs for youth, and to evaluate the effectiveness of existing interventions and programs.

CDC plans to request OMB approval to conduct additional cycles of the NYTS in 2024, 2025, and 2026. The survey will be conducted among nationally representative samples of students attending public and private schools in grades 6–12. The survey will be digital, web-based, self-administered, and will be taken on school or personal computers, tablets, or mobile devices. Information supporting the NYTS also will be collected from state-, district-, and school-level administrators and teachers. During the 2024–2026 timeframe, changes will be incorporated that reflect CDC’s ongoing collaboration with FDA and the need to measure progress toward meeting strategic goals established by the Family Smoking Prevention and Tobacco Control Act. Information collection will occur annually and may include a number of new questions, as well as increased representation of minority youth.

The survey will examine the following topics: Use of e-cigarettes, cigarettes, cigars, smokeless tobacco, hookahs, roll-your-own cigarettes, pipes, snus, dissolvable tobacco, bidis, heated tobacco products, and nicotine pouches; knowledge and attitudes; media and advertising; access to tobacco products and enforcement of restrictions on access; secondhand smoke and e-cigarette aerosol exposure; social determinants of health such as family/household affluence; provision of school- and community-based interventions, and cessation.

Results of the NYTS will continue to be used to inform and evaluate the National Comprehensive Tobacco Control Program, provide data to inform the Department of Health and Human Service’s Tobacco Control Strategic Action Plan, and provide national benchmark data for state-level Youth Tobacco Surveys. Information collected through the NYTS also is expected

to provide multiple measures and data for monitoring progress on seven tobacco-related objectives for Healthy People 2030.

CDC requests OMB approval for an estimated 22,086 annual burden hours over each of the next three years. There are no costs to respondents other than their time to participate.

*Estimated Annualized Burden Hours*

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
State administrators	State-level Recruitment Script for the NYTS	42	1	30/60
District administrators	District-level Recruitment Script for the NYTS	308	1	30/60
School administrators	School-level Recruitment Script for the NYTS	420	1	30/60
Teachers	Data Collection Checklist	1,497	1	15/60
Students	National Youth Tobacco Survey	28,109	1	45/60
	Screening for Cognitive Interviews	300	1	10/60
	Cognitive Interviews	30	2	120/60
	Pilot Testing	100	1	45/60
