Needs and Uses: The Quarterly Survey of Foreign Direct Investment in the United States (BE-605) obtains quarterly data on transactions and positions between foreign-owned U.S.

business enterprises and their “affiliated foreign groups” (i.e., their foreign parents and foreign affiliates of their foreign parents). The survey is a sample survey that covers all U.S. affiliates, except for certain private funds, above a size-exemption level. The sample data are used to derive universe estimates of direct investment transactions, positions, and income in non-benchmark years from similar data reported in the BE-12, Benchmark Survey of Foreign Direct Investment in the United States, which is conducted every five years. The data collected through the BE-605 survey are essential for the preparation of the U.S. international transactions accounts, the national income and product accounts, the input-output accounts, and the net international investment position of the United States. The data are needed to measure the size and economic significance of foreign direct investment in the United States, measure changes in such investment, and assess its impact on the U.S. economy.

Affected Public: Businesses or other for-profit organizations.

Frequency: Quarterly.

Respondent's Obligation: Mandatory.

Legal Authority: International Investment and Trade in Services Survey Act (Pub. L. 94-472, 22 U.S.C. 3101-3108, as amended).
