

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 635

[Docket No. 220919-0193; RTID 0648-XD658]

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries; Closure of the General Category January through March Fishery for 2024

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and
Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS closes the General category fishery for Atlantic bluefin tuna (BFT) for the remainder of the January through March time period. The General category may only retain, possess, or land large medium and giant (*i.e.*, measuring 73 inches (185 centimeters (cm)) curved fork length or greater) when open. This action applies to Atlantic Tunas General category (commercial) permitted vessels and highly migratory species (HMS) Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT. On June 1, 2024, the fishery will reopen automatically.

DATES: Effective 11:30 p.m., local time, January 26, 2024, through March 31, 2024.

FOR FURTHER INFORMATION CONTACT: Larry Redd, Jr.,

larry.redd@noaa.gov, or Ann Williamson, ann.williamson@noaa.gov, 301-427-8503.

SUPPLEMENTARY INFORMATION: BFT fisheries are managed under the 2006 Consolidated HMS Fishery Management Plan (FMP) and its amendments, pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) and consistent with the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*). HMS implementing regulations are at 50 CFR part 635. Section

635.27 divides the U.S. BFT quota, established by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated HMS FMP and its amendments. NMFS is required under the Magnuson-Stevens Act at 16 U.S.C. 1854(g)(1)(D) to provide U.S. fishing vessels with a reasonable opportunity to harvest quotas under relevant international fishery agreements such as the ICCAT Convention, which is implemented domestically pursuant to ATCA.

As described in § 635.27(a), the current baseline U.S. BFT quota is 1,316.14 metric tons (mt) (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area per § 635.27(a)(3)). The current baseline quota for the General category is 710.7 mt. The General category may only retain, possess, or land large medium and giant (*i.e.*, measuring 73 inches (185 cm) curved fork length or greater) when open as specified at § 635.27(a)(1). The General category baseline quota is suballocated to different time periods. Relevant to this action, the baseline subquota for the January through March time period is 37.7 mt. As a result of a prior adjustment, the adjusted subquota for the January through March time period is 58.2 mt (89 FR 3361, January 18, 2024).

Under § 635.28(a)(1), NMFS files a closure action with the Office of the Federal Register for publication when a BFT quota (or subquota) is reached or is projected to be reached. Retaining, possessing, or landing BFT under that quota category is prohibited on or after the effective date and time of a closure notice for that category until the opening of the relevant subsequent quota period or until such date as specified.

Closure of the January through March 2024 General Category Fishery

To date, reported landings for the General category January through March time period total 52.5 mt. Based on these landings, NMFS has determined that the adjusted January through March time period subquota of 58.2 mt is projected to be reached and

exceeded shortly. Therefore, retaining, possessing, or landing large medium or giant (*i.e.*, measuring 73 inches (185 cm) curved fork length or greater) BFT by persons aboard vessels permitted in the Atlantic Tunas General category and HMS Charter/Headboat permitted vessels (while fishing commercially) must cease at 11:30 p.m. local time on January 26, 2024. This action applies to Atlantic Tunas General category (commercial) permitted vessels and HMS Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT and is taken consistent with the regulations at § 635.28(a)(1). The General category will automatically reopen June 1, 2024, for the June through August time period.

During a closure, fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag and release BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs at § 635.26. All BFT that are released must be handled in a manner that will maximize their survival, and without removing the fish from the water, consistent with requirements at § 635.21(a)(1). For additional information on safe handling, see the “Careful Catch and Release” brochure available at <https://www.fisheries.noaa.gov/resource/outreach-and-education/careful-catch-and-release-brochure/>.

Monitoring and Reporting

NMFS will continue to monitor the BFT fisheries closely. Dealers are required to submit landing reports within 24 hours of a dealer receiving BFT as specified at § 635.5(b)(2)(i). Late reporting by dealers compromises NMFS’ ability to timely implement actions such as quota and retention limit adjustments, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General and HMS Charter/Headboat category vessel owners are required to report the catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing <https://www.hmspermits.noaa.gov>, using the HMS Catch

Reporting app, or calling 888-872-8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

After the fishery reopens on June 1, depending on the level of fishing effort and catch rates of BFT NMFS may determine that additional adjustments are necessary to ensure available subquotas are not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas as specified under § 635.27(a)(7). If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may access <https://www.hmspermits.noaa.gov>, for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act and regulations at 50 CFR part 635 and is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and opportunity to provide comment on this action, as notice and comment would be impracticable and contrary to the public interest for the following reasons. Specifically, the regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments and fishery closures to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Providing for prior notice and an opportunity to comment is impracticable and contrary to the public interest as this fishery is currently underway and, based on landings information, the available time period subquota is projected to be reached shortly. Delaying this action could result in BFT landings exceeding the adjusted January through March time period subquota and reduce the opportunity for U.S. fishing vessels to harvest quota later in the year. Taking this action does not raise conservation or

management concerns, and would support effective management of the BFT fishery.

NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota and the inseason adjustment criteria.

For all of the above reasons, the AA also finds that pursuant to 5 U.S.C. 553(d), there is good cause to waive the 30-day delay in effective date.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: January 24, 2024.

Everett Wayne Baxter,

Acting Director, Office of Sustainable Fisheries,

National Marine Fisheries Service.
