Federal Energy Regulatory Commission

[Docket No. CP23-501-000]

Port Arthur LNG, LLC and Port Arthur LNG Common Facilities Company; Notice of Availability of the Environmental Assessment for the Proposed Port Arthur Liquefaction Project Amendment

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Port Arthur Liquefaction Project Amendment (Amendment), proposed by Port Arthur LNG, LLC and Port Arthur LNG Common Facilities Company, LLC (collectively PALNG) in the above-referenced docket.

PALNG proposes to increase the peak construction workforce from its currently authorized workforce of 3,000 personnel up to 6,000 personnel per day at the PALNG Terminal site in Jefferson County, Texas. In addition, PALNG would implement a 24-hour-per-day construction schedule for the remaining construction period at the site. The proposed Amendment includes the 24-hour use of six previously approved park-and-ride lots and one new park-and-ride location.

The EA assesses the potential environmental effects of the Amendment in accordance with the requirements of the National Environmental Policy Act. The EA incorporates by reference the Commission staff's January 2019 Final Environmental Impact Statement issued in Docket No. CP17-20-000 for the Port Arthur Liquefaction Project, and the Commission's findings and conclusions in its corresponding April 18, 2019 Order. Commission staff concludes that approval of the proposed Amendment, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The Commission mailed a copy of the *Notice of Availability* of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. The EA is only available in electronic format. It may be viewed and downloaded from the FERC's website (www.ferc.gov), on the natural gas environmental documents page (<https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents>). In addition, the EA may be accessed by using the eLibrary link on the FERC's website. Click on the eLibrary link (<https://elibrary.ferc.gov/eLibrary/search>), select "General Search" and enter the docket number in the "Docket Number" field (i.e. CP23-501). merits of all issues in this proceeding. Any person wishing to comment on the EA may do so. Your comments should focus on the EA's disclosure and discussion of potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts.
