Title: Examination Survey.

OMB Control No.: 1557-0199.

Type of Review: Regular.

Affected Public: Businesses or other for-profit.

Description: The OCC provides each national bank, Federal savings association, and Federal branch or agency (bank) with an Examination Survey at the end of its supervisory cycle (12- or 18-month period). This information collection permits banks to assess the OCC’s bank supervisory activities, including the:

- Effectiveness of OCC communications with the bank;
- Reasonableness of OCC requests for data and information;
- Quality of OCC decision making during the exam process;
- Professionalism of OCC examining staff; and
- Responsiveness of OCC examiners.

The OCC developed the survey in 1994, at the suggestion of banking industry members who expressed a desire to provide examination-related feedback to the OCC. The OCC considered that expressed desire and concurred. The information collection

continues to be an important tool for the OCC to measure OCC examination performance, design more efficient and effective examinations, and target examiner training.

This information collection continues to formalize and promote a long-standing OCC program. The OCC always has given the institutions it supervises the opportunity to provide input regarding the examination process.

Estimated Burden:

Estimated Number of Respondents: 542.

Estimated Number of Responses per Respondent: 1.

Estimated Annual Burden: 90 hours.

Comments: On January 24, 2024, the OCC published a 60-day notice for this information collection, (89 FR 4657). No comments were received/Discussion of comments and response.

Comments continue to be invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and
