Abstract: Interior is authorized by the Lacey Act (18 U.S.C. 42, 16 U.S.C. 3371-3378 et seq.), the Fish and Wildlife Coordination Act (U.S.C 661 et seq., as amended by John D. Dingell, Jr. Conservation, Management, and Recreation Act, Title 25 U.S.C. 3701, et seq. sec. 7001(b)(2), Pub. L. 116-9) and the Federal Land Policy and Management Act of 1976, as amended, 43 U.S.C. 1701, et seq., to collect this information. Interior is requesting approval to collect information from boaters entering or exiting water areas managed by various bureaus under Interior. The data will help document the presence and evaluate any risks associated with the unintentional introduction of quagga/zebra mussels and other aquatic invasive species in waters managed by the various bureaus under Interior. Collection of this information is required for all watercrafts entering and exiting waters managed by the various bureaus under Interior that have an active watercraft inspection and decontamination program.

The Regional Watercraft Inspection Decontamination Data Sharing System (Regional Database) was developed by the State of Colorado and is currently being utilized by numerous entities within the Western Regional Panel on Aquatic Nuisance Species (WRP). The National Park Service (NPS), U.S. Fish and Wildlife Service, Bureau of Reclamation, and Bureau of Land

Management are part of the WRP and the regional network of state and federal agencies working to prevent the spread of quagga/zebra mussels and other aquatic invasive species (AIS) in the western U.S. The success of this multi-agency effort relies in part upon timely availability of accurate information related to trailered boats at watercraft inspection/decontamination (WID) stations. The Regional Database makes this information available to staff at WID stations, allowing them to assess risk associated with quagga/zebra mussels and other AIS on trailered boats. States have asked Federal partner agencies to use the Regional Database at their sites with WID programs.

Using the Regional Database requires that WID personnel ask boaters four questions and enter the responses via an app on a smartphone or tablet. Two of the four questions vary depending on whether a boater is entering or exiting the waterbody; the other two questions are the same for entering or exiting boaters:

Upon Entering:

1. Has the boat been out of the state in the last 30 days?
2. Where will the boat be launched next?

Upon Entering or Exiting:

1. What compartments or containers on the boat, including ballast tanks, hold water?
2. Does the boater have any live aquatic bait?

Proposed Revision –

We would like to revise the information collection to include watercraft owner or boat hauler/transporter zip code. We are also changing the response time from 4 minutes to 3 minutes.
