SUPPLEMENTARY INFORMATION:

I. Abstract

Upon request, BIS will initiate an investigation to determine the effects of imports of specific commodities on the national security and will make the findings known to the President for possible adjustments to imports through tariffs. The findings are made publicly available and are reported to Congress. The purpose of this collection is to account for the public burden associated with the surveys distributed to determine the impact on national security.

These surveys are designed to gather information so that BIS can evaluate the impact of foreign imports of strategic commodities on the national security of the United States. Each Section 232 study is for a specific commodity or technology that is required for national security reasons (e.g., precision bearings, microprocessors, machine tools, etc). These surveys attempt to determine the size of the domestic U.S. industry, how the domestic U.S. industry has been effected by foreign imports, demand for the commodity during peacetime, demand during wartime, the ability of the U.S. domestic industry to meet a surge in demand during wartime, and the potential impact on U.S. national security if wartime demand cannot be met by domestic U.S. suppliers.

II. Method of Collection

BIS custom-designs unique instruments for each Section 232 survey. The method of collection could be via paper or electronic.
