## **SUPPLEMENTARY INFORMATION:**

### **I. Discussion**

The NRC is issuing a revision in the NRC's "Regulatory Guide" series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The proposed Revision 1 to RG 1.164 was issued with a temporary identification of Draft Regulatory Guide, (DG)-1415 (ADAMS Accession No. ML23187A531). This revision of the guide (Revision 1) updates the guidance to provide additional clarification on the NRC's definition of counterfeit, fraudulent, and suspect items. This revision also

provides additional clarity on requirements applicable to the dedication of commercial-grade items. In addition, the staff made several editorial changes to conform to the current format and content of RGs.

## **II. Additional Information**

The NRC published notice of the availability of DG-1415 in the *Federal Register* on November 17, 2023 (88 FR 80195), for a 30-day public comment period. The public comment period closed on December 18, 2023. Public comments on DG-1415 and the staff responses to the public comments are available under ADAMS Accession No. ML24059A003.

As noted in the *Federal Register* on December 9, 2022 (87 FR75671), this document is being published in the “Rules” section of the *Federal Register* to comply with publication requirements under chapter I of title 1 of the *Code of Federal Regulations* (CFR).

## **III. Congressional Review Act**

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

## **IV. Backfitting, Forward Fitting, and Issue Finality**

Issuance of RG 1.164, Revision 1, does not constitute backfitting as defined in 10 CFR 50.109, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; does not affect issue finality of any approval issued under 10 CFR part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants”; and does not constitute forward fitting as that term is defined and described in MD 8.4, because, as explained in RG 1.164, Revision 1, licensees would not be required to comply with the positions set forth in the RG.

## **V. Submitting Suggestions for Improvement of Regulatory Guides**

A member of the public may, at any time, submit suggestions to the NRC for

improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the "Regulatory Guide" series.
