**SUPPLEMENTARY INFORMATION:** The National Longitudinal Survey of Youth 1979 (NLSY79) is a representative national sample of persons who were born in the years 1957 to 1964 and lived in the U.S. in 1979. These respondents were ages 14 to 22 when the first round of interviews began in 1979; they will be ages 59 to 66 when the planned round thirty-one of interview is conducted in 2024. One of the goals of DOL is to produce and disseminate timely, accurate, and relevant information about the U.S. labor force. The BLS contributes to this goal by gathering information about the labor force and labor market and disseminating it to policymakers and the public so that participants in those markets can make more informed, and thus more efficient, choices. Research based on the NLSY79 contributes to the formation of national policy in the areas of education, training, employment programs, and school-to-work transitions. For additional substantive information about this ICR, see the related notice published in the *Federal Register* on February 14, 2024 (89 FRN 11317).
