SUPPLEMENTARY INFORMATION: CISA's ISD supports the homeland security mission of critical infrastructure security. As part of this mission, CISA Protective Security Advisors (PSAs) conduct various critical infrastructure security assessments for various stakeholders including facility owners and operators; federal, state, and local law enforcement officials; emergency response personnel; and others.

One type of assessment PSAs can perform is an Infrastructure Visualization Platform (IVP). IVPs integrate high-resolution, interactive visual data as well as additional assessment information. For a PSA to conduct an assessment, each stakeholder must complete an IVP Pre-Collection Questionnaire. When the form is completed and submitted, the IVP team can better plan for the assessment by reviewing locations designated as Areas of Emphasis (AOEs) to ensure those areas receive an assessment, to know who appropriate points of contact are (stakeholder requesting and escort who will be with the team during the collect), and to address special considerations prior to showing up for the collect.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for

the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and,
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
