Hybrid Renewables LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions to Intervene, and Competing Applications

On May 13, 2024, Hybrid Renewables LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project to be located at the U.S. Army Corps of Engineers' (Corps) Oologah Lake Dam near the Town of Oologah, in Rogers County, Oklahoma. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Oologah Lake Dam Hydroelectric Project would consist of the following: (1) an steel extension to the existing dam's left outlet conduit that would house a control valve and connect to; (2) a 19-foot-diameter, 228-foot-long steel penstock; (3) the penstock would split into two 16.5-foot-diameter, 58-foot-long and 49-foot-long penstocks before entering; (4) an 80-foot-long, 19-foot-wide, powerhouse containing two turbine-generator units with a total capacity of 24.0 megawatts; (5) a 100-foot-long, 63-foot-wide concrete tailrace; and (6) a .37-mile-long, 138 kilovolt transmission line with a new substation at its end. The proposed project would have an estimated annual generation of 64,600 megawatt-hours.
