OMB Control Number: 3060-1291.

Total Annual Burden: 1,760 hours.

Total Annual Cost: No cost.

Needs and Uses: On November 18, 2011, the Commission released the USF/ICC Transformation Order (FCC 11-161) in which it comprehensively reformed and modernized the universal service and intercarrier compensation systems to ensure that robust, affordable voice and broadband service, both fixed and mobile, are available to Americans throughout the nation. In the USF/ICC Transformation Order, the Commission, among other things, adopted a requirement that all eligible telecommunications carriers (ETCs) offer broadband service in their supported area that meets certain basic performance requirements and report regularly on associated performance measures as a condition of receiving federal high-cost universal service support.

On October 27, 2020, the Commission adopted the 5G Fund Report and Order (FCC 20-150) in which it, among other things, helped to complete the reform of the high-cost program begun in the USF/ICC Transformation Order by adopting additional public interest obligations and performance requirements for legacy high-cost support recipients, whose broadband-specific public interest obligations for mobile wireless services were not previously detailed. The public interest obligations adopted in the 5G Fund Report and Order for each competitive ETC receiving legacy high-cost support for mobile wireless services require that such competitive ETC (1) use an increasing percentage of its legacy support toward the deployment, maintenance, and operation of voice and broadband networks that support 5G meeting the adopted performance requirements within its subsidized service area(s), and (2) meet specific 5G broadband service deployment coverage requirements and service deployment milestone deadlines that take into consideration the amount of legacy support the carrier receives.

In order to gain a complete understanding of the current service offerings of each competitive ETC receiving legacy high-cost support for mobile wireless services, the Commission adopted rules that require each such competitive ETC to file an initial report containing information and certifications about its current mobile service offerings in each of its subsidized service areas and how it is using legacy support and whether it is offering mobile services in its subsidized service areas at rates that are reasonably comparable to those charged in urban areas. See 47 CFR 54.322(g), (h). The information and certifications provided in these initial reports will be used by the Commission to ensure that competitive ETCs receiving legacy high-cost support for mobile wireless services deploy 5G service by in their subsidized service areas consistent with the rules adopted by the Commission in the 5G Fund Report and Order.

A revision to the currently approved information collection requirements under OMB 3060-1291 is necessary in order to remove a requirement that applies only to the annual reports that must be filed by competitive ETCs receiving legacy high-cost support for mobile wireless services information requirement, which was inadvertently included in the information collection under OMB 3060-1291 as previously approved by OMB.
